

## **SoBran Receives Three Year, \$6.2 Million Recompete Contract**

FAIRFAX, Va. (February 3, 2010) SoBran Inc., an ISO 9001:2008 certified professional services company, recently received a three-year, \$6.2 million recompete contract to provide engineering and technical support services to the 309th Software Maintenance Group at Hill Air Force Base, Utah. SoBran's engineers and administrators will continue supporting the development of software for the USMC Expeditionary Fighting Vehicle (EFV).

“SoBran is proud to be a key industry partner in the development of the EFV for the USMC,” said Richard P. Swank, SoBran's Senior Program Manager for Engineering & Technical Services

The EFV is an armored amphibious vehicle capable of seamlessly transporting Marines from Naval ships located beyond the visual horizon to inland objectives. As a keystone for the Marine Corps Expeditionary Maneuver Warfare (EMW) and Ship-to-Objective Maneuver (STOM) warfighting concepts, the vehicle will become the primary means of tactical mobility for the Marine Rifle Squad during amphibious operations and subsequent ground combat operations ashore. While providing the speed and maneuvering capabilities to operate with the main battle tank on land, current obstacles to the landing force such as oceans, lakes and rivers, can be used by the EFV as high speed avenues of approach and maneuver.

SoBran has worked with various organizations at Hill AFB for more than a dozen years and is an incumbent contractor, working on the EFV Program since October, 2005. To date, SoBran has received 15 of 42 task orders awarded. Additionally, SoBran assisted the 309th SMXG during CMMI Level 5 recertification in 2006, and works daily in the CMMI Level 5 environment.

### **About SoBran, Inc.**

SoBran is a rapidly growing technical and professional services company, serving government and industry since 1987. We partner with customers to solve problems affecting critical missions in biomedical research, biotechnology, preclinical research, defense, homeland security, environmental protection, and national energy policy. ISO 9001:2008 certified, SoBran brings process orientation and rigorous quality standards to all our projects. We offer services through the GSA IT, PES and LOGWORLD schedules and several GWAC contract vehicles. Headquartered in Dayton, OH, SoBran has major offices in Fairfax, VA, Burtonsville, MD, and Jacksonville, FL, with additional field offices providing direct support for federal and commercial clients.
